

(3) *Records.* The handler shall maintain a copy of each form FSA-1007 that is issued for any peanuts that are placed in nonsupervised identity preserved storage and that is issued for any peanuts that are removed from such storage.

§ 1446.502 Physical supervision of contract additional peanuts.

(a) *Supervision.* A handler who has chosen to operate under physical supervision shall make arrangements that are satisfactory to the marketing association for representatives of the marketing association to conduct onsite supervision of domestic handling of contract additional peanuts including storing, shelling, crushing, cleaning, milling, blanching, weighing, and shipping.

(b) *Final dates for scheduling supervision.* Contract additional farmers stock peanuts shall be scheduled for supervision by the marketing association during the normal marketing period but not later than August 15 of the calendar year following the year in which the crop was grown, unless prior approval of a later date has been made by the marketing association.

(c) *Notifying the marketing association.* Before moving or processing any contract additional peanuts, the handler or an agent of the handler shall notify the marketing association of the time such operation will begin and the approximate period of time required to complete the operation. When a plant is not currently under supervision, the handler shall give at least five working days of advance notice to the marketing association so that supervision can be arranged.

(d) *Processing.* The identical peanuts identified at time of load-out as contract additional peanuts shall be shelled or otherwise milled, crushed, or shelled and crushed under supervision of the marketing association as a continuous operation separate from other peanuts. Shelled peanuts shall be identified with positive lot identity tags before being stored and moved for crushing, exportation, or processing into peanut products to be exported. Except as otherwise authorized by the marketing association, such peanuts will be considered as having been

crushed or exported only if positive lot identity has been maintained in the following manner:

(1) *Transportation.* The peanuts shall be transported from storage locations in a covered vehicle such as a truck or railroad car. The vehicle shall be sealed unless the marketing association determines that identity of the peanuts can be maintained without sealing.

(2) *Storage.* Farmers stock peanuts shall be stored in a separate building(s) or bin(s) which can be sealed or which the marketing association otherwise determines will satisfactorily maintain lot identity. Milled peanuts shall be stored in such a manner that the marketing association, under procedures issued by CCC, may make periodic inventory verification of the contract additional lots that are shown on marketing association records as being in the storage facility. The handler shall furnish to the marketing association the name and location of the storage facilities in which the contract additional peanuts are located.

§ 1446.503 Disposition requirements under physical supervision.

(a) *Methods of disposition.* Except under the provisions of § 1446.504 of this part applicable to substitution, the identical contract additional farmers stock peanuts and milled peanuts that are shelled under supervision of the marketing association and formed into lots shall be disposed of, in accordance with the provisions of this part that are applicable to contract additional peanuts and to physical supervision, by domestic crushing or by export to an eligible country as follows:

(1) All kernels may be crushed domestically under supervision of the marketing association representative; or

(2) All kernels may be exported for crushing, if fragmented; or

(3) All kernels that meet the standards established for the domestic market under the Marketing Agreement No.146 may be exported and the remaining kernels crushed domestically under supervision of the marketing association representative; or
